TRUE

True PS900 Recumbent \$2395

SELF POWERED

The PS900 recumbent bike is self-generating and therefore can be placed anywhere in your facility. The 2 stage drive system with Poly-V belts combine for a very smooth and quiet riding experience.

PRE-PROGRAMMED WORKOUTS

Six pre-programmed workouts including manual, quick start, random, cardio, fat burn and hills provide a variety of training options for users with a wide range of abilities and goals. Programming on the fly allows users to adjust workout settings while using the bike.

TRUE

True PS50 Recumbent \$1895

SAFETY AND COMFORT

The walk-through design on the TRUE® PS50 recumbent bike accommodates users of all fitness levels. TRUE's new mesh seat is ergonomically designed for lumbar support and allows for infinite adjustment to fit every body type and relieve painful stress on the hip. The mesh material also provides excellent ventilation during exercise.

EFFECTIVE AND INSPIRING

TRUE's patented HRC (Heart Rate Control)® and HRC Cruise Control™ provide an array of possibilities for your workout. The PS50's multiple pre-programmed workouts keep your routine fresh, varied and challenging while achieving your fitness or weight loss goals, and programming on the fly makes your workout easy to adapt as you go. These unique features help you train more efficiently, keep pace with your goals and maximize each workout.

NAUTILUS

Nautilus NR3000 Recumbent Bike \$2099 Delivered

The frictionless V-Force™ Plus system delivers a wide range of resistance levels and ultra-smooth performance.

Remote Operation Control™ (ROC™) system is built into the arm handles, so you can start and change the intensity level without moving your hands.

The commercial-grade poly-V belt drive provides near-silent operation and maintenance-free performance.

Results Mode displays your total workout time, distance, and calories burned, plus average speed, RPM and heart rate.

Heart Rate Control programs monitor your heart rate and automatically adjust the intensity level based on your target zone. Touch rate sensors and a wireless heart-rate transmitter belt are included.
